#### ADVANCED CONTRACT AWARD NOTICE

An Advance Contract Award Notice (ACAN) allows departments and agencies to post a notice, for no less than fifteen (15) calendar days, indicating to the supplier community that it intends to award a good, service or construction contract to a pre-identified supplier. If no other supplier submits, on or before the closing date, a Statement of Capabilities that meets the requirements set out in the ACAN, the contracting authority may then proceed with the award. However, should a Statement of Capabilities be found to meet the requirements set out in the ACAN, then the contracting officer will proceed to a full tendering process.

#### TITLE:

Prototype Canadian Urban Environment Pattern

#### REQUIREMENT:

The Department of National Defence, Defence Research and Development Canada - Suffield, (DRDC-S), AB, has a requirement to develop a Canadian Urban Environment Pattern (CUEPAT) based on the unique requirements of Canada's three major metropolitan areas, Vancouver, Toronto and Montreal. The current CBR individual protective equipment (IPE) used by the Canadian military is provided in a woodland or desert camouflage. A camouflage suited to the Canadian urban environment is required when the military operates in urban terrain.

#### SUBSTANTIATION FOR SOLE SOURCING:

The Contractor holds the proprietary right to the advanced fractal algorithms and feed back loop technology to develop non-repeating digital camouflage patterns. HyperStealth Biotechnology Corporation's design team of Guy Cramer and Timothy R. O'Neill share copyright on approximately 8,000 digital camouflage patterns. Access to this extensive data base for the purposes of developing a new Canadian urban environment camouflage pattern is critical to the success of the project. All Intellectual Property Rights in the Foreground Information shall belong to the Contractor as soon as they come into existence. There are no alternative sources of supply for this requirement as no other Canadian source exists that has the capability to design and develop digital, non-repeating camouflage patterns using state-of-the-art fractal algorithms and feed back loop technology, with concomitant IP protected access to approximately 8,000 copyrighted patterns that can be used in full support of meeting the requirement.

Public Works and Government Services Canada, Treasury Board Policy: sole source allowed under: Government Contract Regulation, PWGSC SM Section 5.002 (d) Only one person capable of performing the Contract.

To qualify a bid will have to consist of no less than 80% of goods/and or services of Canadian origin.

OWNERSHIP OF INTELLECTUAL PROPERTY: Contractor owned.

#### PERIOD OF CONTRACT:

It is anticipated that any contract will be effective from date of contract to March 31, 2010. Contract may result in follow on related work.

#### ESTIMATED EXPENDITURE:

The estimated budget for this contract is \$24,900.00, GST extra.
